

Stonemasons of Distinction

Chesini House is a leading Australian processor of natural stones for the building, commercial and memorial industry. Our stone products are regularly supplied to clients across Australia including other Stonemasons, Cemeteries, Councils and Construction Companies. In the Adelaide metropolitan area memorials are sold to the general public through Italian Monumental Art Australia.

The Company has been involved in the stone industry for over forty years and draws on the knowledge and expertise acquired both in Australia and Europe, of architects, accountants and engineers which form part of its managerial structure.

Its success is a result of an unrivalled technical base and the implementation of state of art machinery ensures that its products are only of the highest quality. Durability of its products is achieved by only using the best possible raw materials and a strict quality control system. All memorials are manufactured in our South Australian factory. No polish enhancement products (lacquers, waxes or resins) are used on any of our products which is characteristic of many cheaper, lower quality imports currently being offered by some competitors in the market place.

The products and services offered range from the restoration of public works including the Adelaide Magistrates Courts, granite kerbing and paving, slabs for the memorial and construction industry, granite countertops and memorials.

The memorials supplied range from simple tablets for lawn areas, headstones and full monumentation including family chapels.

Please do not hesitate to contact us for more information on whatever your stone requirements.
